PROFESSIONAL SUMMARY

Senior WordPress and PHP developer with over eight years of experience delivering custom websites, plugins, themes, and PHP business applications for clients across Canada, the United States, the United Kingdom, and Europe. Writes clean, scalable code by hand instead of relying on page builders, and brings strong command of backend logic, frontend development, MySQL, and REST API integration. Has led development teams, carried projects from first planning session through launch, and worked in close partnership with international clients and senior management. Career delivery covers more than 200 websites, over 35 fully custom WordPress builds, and 15 plus PHP web applications across agency and remote contract settings. Comfortable setting technical direction, mentoring developers, and turning business requirements into dependable, high performing software.

CORE COMPETENCIES

Custom WordPress Development · Core PHP Development · Plugin and Theme Engineering · Full Stack Web Development · REST API Design and Integration · MySQL Database Design · Performance Optimization · Technical Team Leadership · Client and Stakeholder Management · Project Planning and Delivery · Business Process Automation · Code Review and Quality Standards

Leadership and Delivery: Team management, project planning, requirement gathering, client communication, on time delivery

PROFESSIONAL EXPERIENCE

Senior Web Developer

Mar 2025 – Present

OmniVue Marketing · Remote, Canada

- Develop custom WordPress websites for a Canadian marketing agency, coding bespoke themes and plugins by hand to keep every site fast, secure, and simple to maintain.
- Build internal tools and automation systems that cut repetitive manual work and speed up the agency's day to day operations.
- Connect client websites to marketing, CRM, and reporting platforms through REST APIs and tailored custom integrations.
- Raise site speed and Core Web Vitals scores across client projects, strengthening both search visibility and user experience.
- Own each build across the full stack, from database structure and backend logic through to frontend delivery and deployment.
- Guide the wider team on technical approach and coding standards, keeping custom work consistent and reliable.
- Delivered modern frontend work in React (two builds) and designed client sites on Squarespace and Framer (two projects each), broadening the agency's stack beyond custom WordPress.

Senior Web Developer

Dec 2023 – Feb 2025

Ezify SMC Pvt. Ltd. · Lahore, Pakistan (Canadian office, North American clients)

- Delivered custom development across 50+ client websites, including 35+ bespoke WordPress builds and 15+ Core PHP and custom web applications, for a client base concentrated in Canada and the United States.
- Engineered reusable WordPress plugins and themes built to each client's specification, replacing template driven sites with scalable solutions.
- Served as senior technical contact for North American clients, scoping requirements, setting expectations, and reporting through to final delivery.

- Mentored junior developers and reviewed their code, lifting overall quality and keeping releases on schedule.
- Ran full stack delivery across frontend, backend, and database, alongside ongoing maintenance, optimization, and bug resolution.

Senior Web Developer

Dec 2021 – Nov 2023

Alam Digital · Lahore, Pakistan

- Led the development team and directed the build process across several client projects running in parallel.
- Created custom WordPress websites, plugins, and themes to match a wide range of client briefs, handling both frontend and backend work.
- Acted as the main technical point of contact for clients, translating their business goals into practical, working solutions.
- Introduced development standards and review practices that improved code quality and made delivery far more consistent across the team.

Technical Team Lead (Remote Contract)

Jun 2021 – Nov 2021

HA Constructions Ltd · London, United Kingdom (remote)

- Led the development team for a London organization on an international remote contract, reporting directly to senior management.
- Designed and built internal business software that supported core operations and streamlined how the company managed daily workflows.
- Delivered the company website from start to finish, covering requirements, build, and final deployment.
- Coordinated the team and shipped every custom solution on schedule throughout the engagement.

PHP and WordPress Developer

Oct 2019 – Jun 2021

The GreatSol · Lahore, Pakistan

- Built and maintained web applications in Core PHP and WordPress, covering both server side logic and client facing interfaces.
- Developed responsive interfaces with HTML5, CSS3, JavaScript, and Bootstrap, then resolved bugs and performance issues to keep client sites stable.
- Stepped into a leadership role during the final months of the role, managing the development team and coordinating project delivery.

Web Developer

Jan 2018 – Oct 2019

TradesOut · Lahore, Pakistan

- Built websites and web applications in Core PHP and WordPress, pairing solid backend logic with responsive HTML5, CSS3, JavaScript, and Bootstrap front ends.
- Maintained and updated live client sites, fixing bugs and applying improvements that kept them secure and current.

KEY ACHIEVEMENTS

- Delivered more than 200 websites over an eight year career spanning agency teams and international remote contracts.
- Shipped 35+ fully custom WordPress builds and 15+ Core PHP and custom web applications to client specification.
- Designed and deployed two to three internal business software systems that supported core company operations.
- Built an extensive catalogue of custom WordPress plugins and themes, choosing maintainable code and scalable structure over page builders.
- Progressed from developer to technical lead, taking on team management responsibility across several companies.
- Earned repeat, long standing working relationships with clients across Canada, the United States, and the United Kingdom.

EDUCATION

Bachelor of Science in Software Engineering

2019

University of Management & Technology (UMT), Lahore, Pakistan
